In the Claims:

21. (Currently Amended) A method of enabling the display of a picture file on a cellular telephone, said method comprising the steps of:

receiving said picture file at said cellular telephone;

simultaneously displaying a plurality of picture files on a display of said cellular telephone;

enabling a user to change information displayed with said picture file of said plurality of picture files by way of a user interface on said cellular telephone;

providing a selection option associated with said picture file when said picture file is displayed on said cellular telephone; and

enabling access by said user, remote from said cellular telephone to said plurality of picture files and said information which has been changed by way of a webpage for a user associated with a wireless service provider for said cellular telephone, to said plurality of picture files and said information which has been changed.

- 22. (Previously Added) The method of claim 21 wherein said step of receiving said picture file at said cellular telephone comprises receiving said picture file by way of a wireless link of a telecommunications network.
- 23. (Previously Added) The method of claim 21 wherein said step of receiving said picture file at said cellular telephone comprises receiving said picture file as a attachment to an email.
- 24. (Previously Added) The method of claim 21 further comprising a step of storing said picture file on said cellular telephone.
- 25. (Previously Added) The method of claim 21 wherein said step of providing a selection option comprises providing a selection box associated with said picture file which can be

selected by a user.

26. (Currently Amended) A method of enabling the display of a picture file on a cellular telephone, said method comprising the steps of:

storing a plurality of picture files on said cellular telephone;

simultaneously displaying said plurality of picture files on a display of said cellular telephone;

enabling a user to change information displayed with a picture file of said plurality of picture files by way of a user interface on said cellular telephone;

providing a selection option associated with said picture file displayed on a display of said cellular telephone;

enabling a user to designate said selection option while said picture file is displayed on said cellular telephone; and

enabling access by said user, remote from said cellular telephone to said plurality of picture files and said information which has been changed by way of a webpage for a user associated with a wireless service provider for said cellular telephone, to said plurality of picture files and said information which has been changed.

- 27. (Previously Added) The method of claim 26 further comprising a step of receiving said at least one picture file by way of a wireless link of a telecommunications network.
- 28. (Previously Added) The method of claim 27 wherein said step of receiving a picture file by way of a wireless link of a telecommunications network comprises receiving said picture file as an attachment to an email.
- 29. (Previously Amended) The method of claim 26 wherein said step of enabling a user to designate said selection option further comprises a step of enabling a user to select a function for presenting said picture file.

- 30. (Previously Added) The method of claim 26 further comprising a step of enabling said user to enlarge said picture file.
- 31. (Currently Amended) A method of enabling the display of a picture file on a cellular telephone, said method comprising the steps of:

simultaneously displaying a plurality of picture files on a cellular telephone; enabling a user to change information displayed with a predetermined picture file of said plurality of picture files by way of said user interface on said cellular telephone;

providing a selection option associated with said predetermined picture file when said predetermined picture file is displayed on said cellular telephone;

enabling a user to designate a selection option associated with said predetermined picture file;

enabling a user to enlarge said predetermined picture file; and
enabling access by said user, remote from said cellular telephone to said plurality of
picture files and said information which has been changed by way of a webpage for a user
associated with a wireless service provider for said cellular telephone, to said plurality of picture
files and said information which has been changed.

- 32. (Previously Added) The method of claim 31 wherein said step of displaying a picture file on a cellular telephone comprises displaying a thumbnail of said picture file.
- 33. (Previously Added) The method of claim 32 wherein said step of enlarging said picture file comprises a step of displaying said picture file as a window on a display of said cellular telephone.
- 34. (Previously Added) The method of claim 31 further comprising a step of enabling the selection of said picture file.
- 35. (Previously Added) The method of claim 31 further comprising a step of presenting said

picture file having a designated selection option according to a user selectable function.

36. (Currently Amended) A method of enabling the display of a picture file on a cellular telephone, said method comprising the steps of:

storing a plurality of picture files on said cellular telephone;

simultaneously displaying said plurality of picture files as thumbnails on said cellular telephone;

enabling a user to change information displayed with a picture file of said plurality of picture files by way of a user interface on a cellular telephone;

providing a plurality of selection options, each said selection option being associated with a picture file of said plurality of picture files;

enabling a user to designate each said selection option associated with said plurality of picture files; and

enabling access by said user, remote from said cellular telephone, to said plurality of picture files and said information which has been changed by way of a webpage for a user associated with a wireless service provider for said cellular telephone, to said plurality of picture files and said information which has been changed.

- 37. (Previously Added) The method of claim 36 further comprising a step of receiving at least one picture file of said plurality of picture files by way of a wireless link of a telecommunications network.
- 38. (Previously Amended) The method of claim 37 further comprising a step of enabling the selection of a picture file of said plurality of picture files.
- 39. (Previously Added) The method of claim 38 further comprising a step of enabling the enlargement of said picture file.
- 40. (Previously Added) The method of claim 39 wherein said step of enabling a user to

designate each said selection option associated with said plurality of picture files comprises a step of enabling a user to designate a selection box to select a display feature.

- 41. (Currently Amended) A cellular telephone capable of displaying a picture file, said cellular telephone comprising:
 - a control circuit;
 - a memory coupled to said control circuit and storing a plurality of picture files;
- a user interface coupled to said control circuit and enabling the user to access said plurality of picture files, said user interface enabling a user to change information displayed with a picture file;
- a display coupled to said control circuit and displaying said picture file with said plurality of picture files and a selection option associated with said picture file; and
- a webpage associated with a wireless service provider for said cellular telephone, said webpage enabling access by said user, remote from said cellular telephone, to said picture file and said information which has been changed.
- 42. (Previously Added) The cellular telephone of claim 41 wherein said selection option comprises a check box.
- 43. (Previously Added) The cellular telephone of claim 41 further comprising an icon on said display, said icon enabling access to said picture file when said icon is selected.
- 44. (Cancelled) The cellular telephone of claim 41 further comprising a plurality of picture files stored in said memory.
- 45. (Previously Amended) The cellular telephone of claim 41 further comprising a plurality of selection boxes, each said selection box stored with a picture file of said plurality of picture files.

- 46. (Previously Amended) The cellular telephone of claim 44 wherein said selection box enables a user to select a function for displaying said picture file.
- 47. (Previously Added) The cellular telephone of claim 41 wherein said user interface enables the selection of said selection box.
- 48. (Previously Added) The cellular telephone of claim 41 wherein said user interface enables the user to enlarge the picture file.
- 49. (Previously Added) The cellular telephone of claim 41 wherein said picture file comprises a thumbnail.
